

Jenzabar's Portal with Moodle Integration

Broaden the Capabilities of Your Campus Portal with Open-Source Integration

Our award-winning campus portal, Jenzabar's Internet Campus Solution (JICS), provides all of your constituents with a single point of access to Web-based self-service, e-learning, communications, and community-building applications. And now Jenzabar's Application Interoperability architecture extends the industry-leading JICS framework to include the open-source Moodle course management platform. In higher education's interconnected campus computing environment, Jenzabar's innovative technology keeps you and your institution at the forefront—today and into the future.

Protecting Your Open Source Investment

If your institution is one of the many schools that have adopted Moodle as a platform for managing your learning environments, you know how important it is to maximize your investment in this open source course management system. Jenzabar's innovative Application Interoperability architecture now makes it possible for JICS users to interface directly with Moodle.

Seamless integration between Moodle and the JICS portal enables institutions to streamline course management. And faculty can continue to use courseware that they have developed or adopted from the open source community.

Other key benefits of JICS integration with Moodle:

- Administrative tools enable users to selectively upload information from JICS to Moodle
- Run-time synchronization allows students to immediately access courseware and materials developed in Moodle with a single portal sign-on
- A familiar, consistent user interface helps faculty manage tasks easily and efficiently

Students and faculty signed onto the JICS campus portal can easily access Moodle applications through both the “My Courses” and the “Academics” tabs. This intuitive user interface enables your institution to maximize use of the portal and foster strong campus community relationships.

Co-Existing Applications to Meet Your Needs

The Jenzabar integration architecture allows your institution to optimize your choice of applications. Some departments may wish to use Jenzabar's new e-Racer learning management system, while others may choose Moodle. The JICS portal provides seamless, common access to both solutions across the campus.

Migration Made Easy

Moving from one system to another often leads to inadvertent down time, increased training requirements, and the loss of critical data. Jenzabar helps ease that transition by integrating Moodle with Jenzabar's enterprise applications.

Jenzabar's integration architecture enables applications and portlets to co-exist—making it easy to schedule a deployment timeline that maximizes system availability. Training requirements are reduced as users work through a common interface. And staging data within the critical enterprise applications ensures that nothing is lost during the transition.

Jenzabar makes it simple to adopt a comprehensive campus portal strategy that includes third-party applications like Moodle. A full range of Jenzabar Constituent Relationship Modules provide tight integration between your student administrative system and the portal, so all your constituents have 24/7 access to data and communication options—inspiring a lasting affinity for your school.

Jenzabar Constituent Relationship Modules

- ▷ CRM Admissions Officer
- ▷ CRM Advancement Officer
- ▷ CRM Candidate
